

# Hobbypaint Semigloss

## Properties

Type: Alkyd enamel Scandia Hobby Enamel Gold Bronze is a quick-drying enamel based on binding agent. Cannot be lacquered with clear lacquer. Gold Bronze may be smudging. The odour from drying alkyd paint can be felt strong/unpleasant. At normal temperatures and humidity the odour will decrease gradually. Provide for good airing and ventilation. Choose alternative water-based acrylic paint that does not give the same odour problems.

## Use

Suitable interior for painting on minor surfaces of metal and, e.g. hobby articles etc.

The substrate must be clean, dry, solid and suitable for being painted. It must be without any grease, oil, wax and scraps of soap.

Untreated surfaces should be primed.

Stir the paint well before and during use.

Apply by brush.

## Technical Data

Gloss	Semi Gloss
Density (kgs/l)	1,2
Solids Weight %	38
Nominal spreading rate (m <sup>2</sup> /ltr.)	1
Min. working temp. during application and drying/curing	Min. +10°C
Drying time at 20° C, 60 % RH (Hours)	1
Recoatable at 20° C, 60 % RH (Hours)	4
Fully cured at 20° C, 60 % RH (Days)	28
Dilution	Should not be diluted
Cleaning of Tools etc.	White spirit
